# Our Story

— our history —

## Our Story

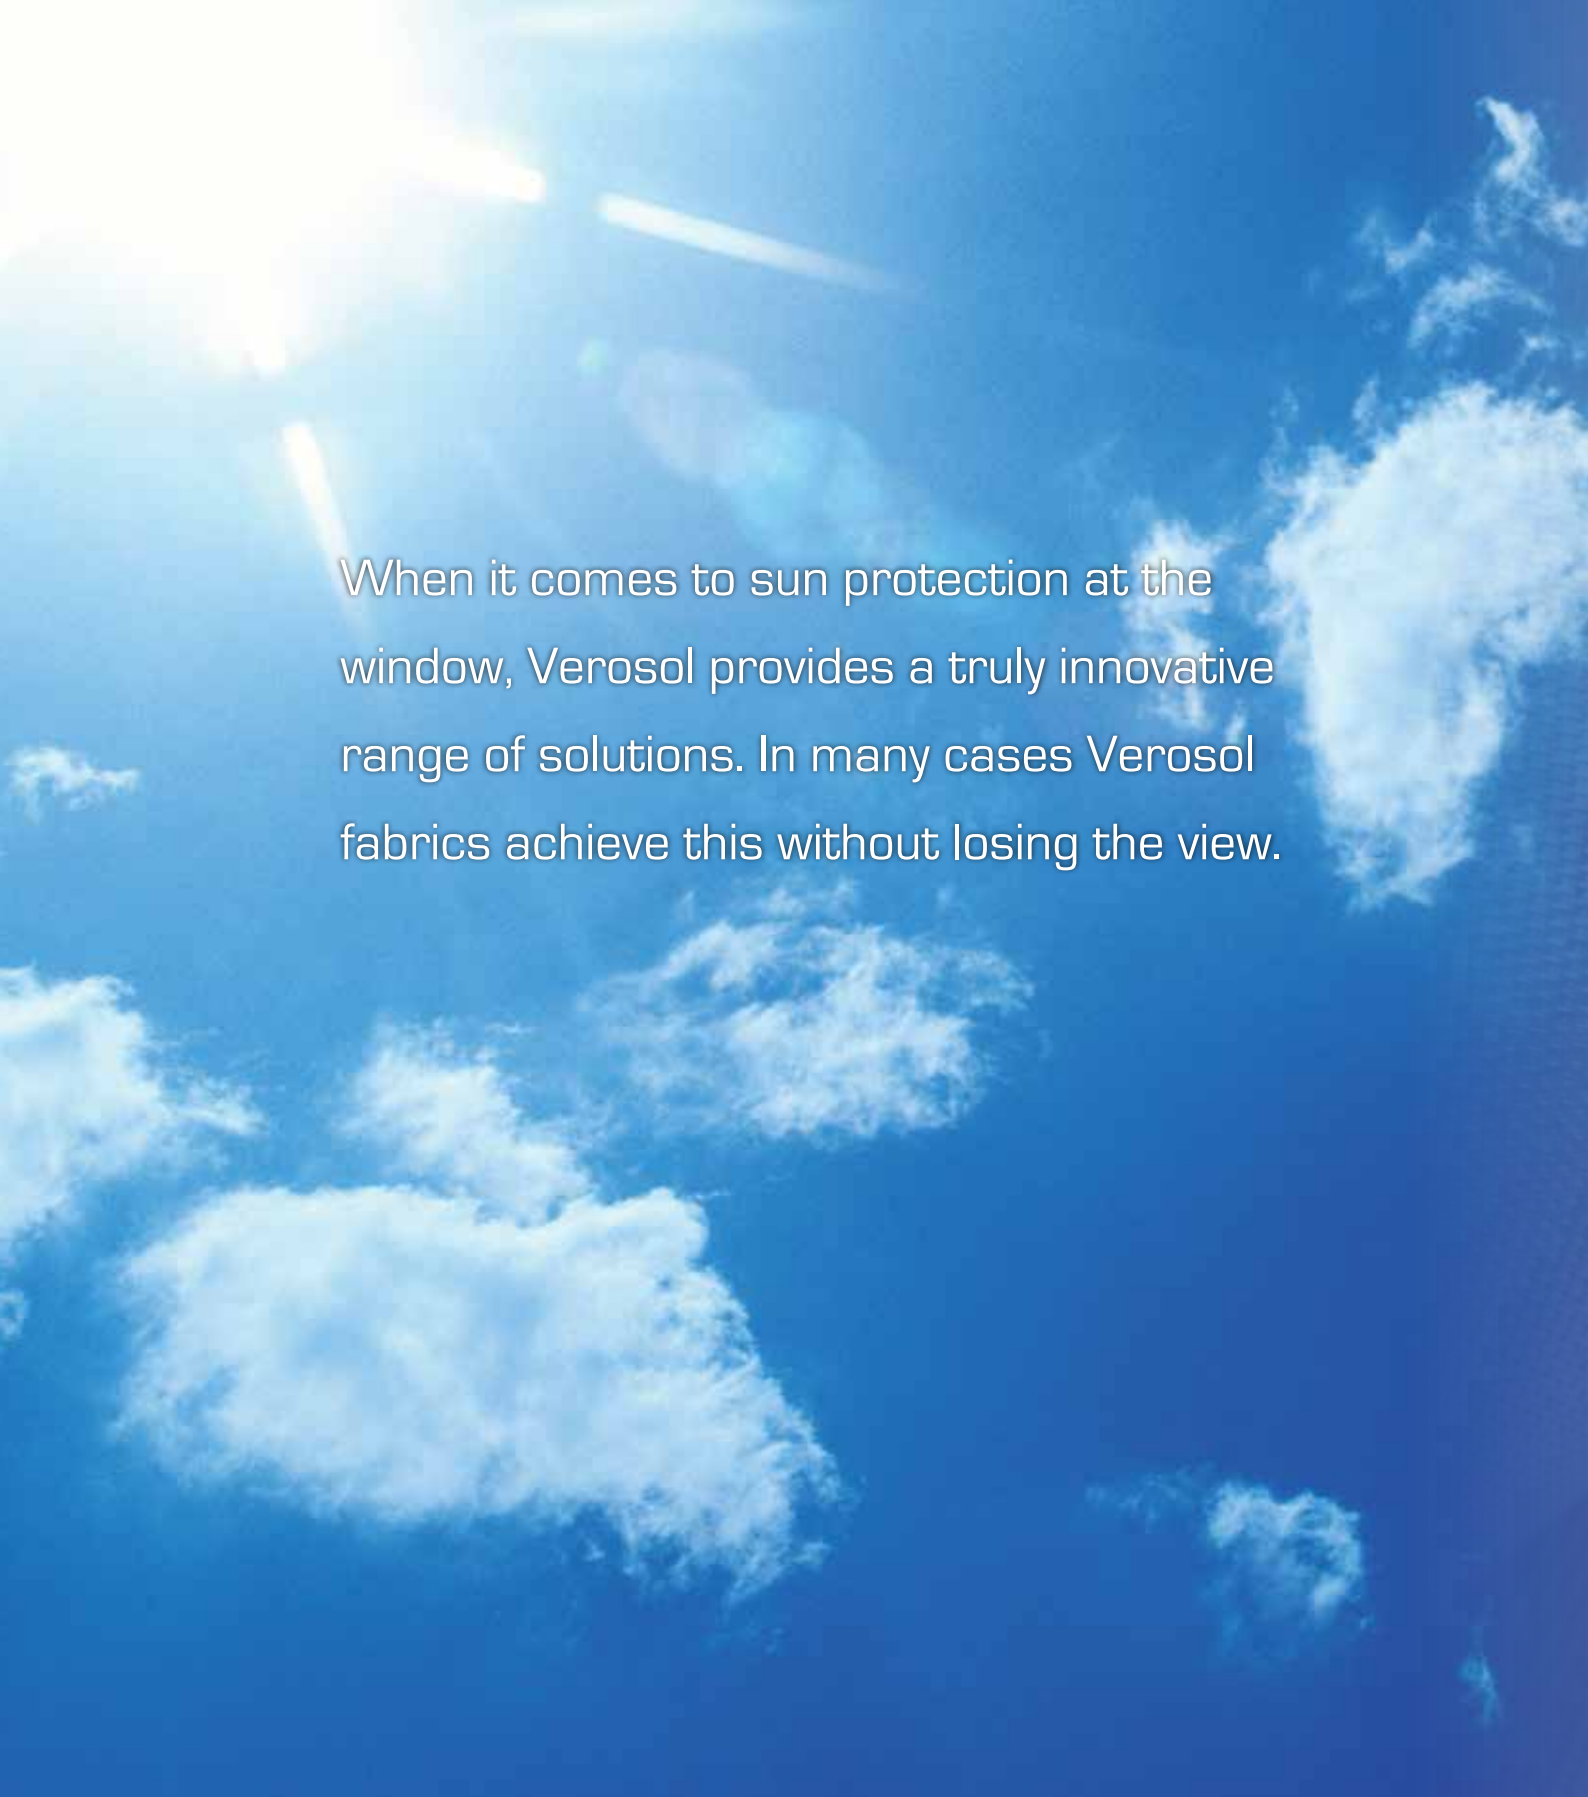

Our story started back in 1963 when Cornelis Verolme, the famous Dutch shipbuilder sailed into New York Harbour and marvelled at the imposing skyline. He noticed that the towering skyscrapers of New York were mostly clad in glass and thought how difficult it must have been to keep them cool in summer and warm in winter.

Cornelis became passionate with the idea of finding a solution to this problem and experimented tirelessly with many ideas and concepts. In 1965 he established the Verolme vacuum metallising company and developed a process - still unique today, of applying a microscopic layer of aluminium to textile. Cornelis believed that if he could create metal backed fabrics that could be made into curtains and blinds, with the metal side facing outwards, heat and glare could be reflected back outside the building. By regulating this heat and light, buildings could not only benefit by significant energy savings but would also create a much more comfortable environment for occupants. The innovation was born and the name Verosol was created from the first four letters of Cornelis' surname VERO and the word SOL, meaning sun.

Since those early years, we continue to live Cornelis' legacy and strive to create sustainable environments where people can live and work comfortably.

# Verosol

When it comes to sun protection at the window, Verosol provides a truly innovative range of solutions. In many cases Verosol fabrics achieve this without losing the view.

## Solar Control

— minimise heat, glare & fading —

Leading the way is Verosol's range of metal backed fabric blinds which provide unparalleled and uncompromised performance.

These metal backed fabrics reduce heat and glare without sacrificing interior or exterior appearance. In fact, they provide a uniformly off-white exterior look irrespective of the interior colour selected. And whatever the colour, they maximise UV protection.

Verosol also has a comprehensive range of products to satisfy room darkening requirements. These blinds control the morning heat and light in bedrooms, cut the heat of a western aspect and regulate light and heat in conservatories, etc.

Where heat, glare and light control are important, Verosol has a range of fabrics for roller, pleated, roman and panel glide blinds to suit any home, apartment and decor.

Verosol metal backed fabrics are made with an environmentally responsible outlook.

These fabrics lead the way in regard to

- sustainability
- local & international certification
- greenhouse gas reduction
- recyclability

## Creating a better environment

— working towards a sustainable future —

Green planet considerations are a Verosol priority at a time when global warming is in the hearts and minds of Governments, businesses and individuals alike. In fact, Verosol can foresee a time when the use of its fabric will deliver carbon credits as well as dollar savings in power consumption.

To estimate possible reductions in CO<sub>2</sub> emissions simply visit [verosol.com.au](http://verosol.com.au) and click on the Savings Calculator.

To the extent that it is possible, Verosol adopts a cradle to cradle approach during the design of new products. Verosol has also successfully implemented a take-back option for its products including Polyester fabrics, cardboard tubes and aluminium.

## Roller Blinds

— understated elegance —

Roller blinds are a simple, yet tasteful means of not only controlling light and warmth, but also providing a subtle ambience, enabling tranquillity and relaxation.

## Roller Blinds

— linked blinds, the uncluttered look —

As well as contemporary elegance, Verosol Roller blinds provide the ability to link many blinds from one control, thereby minimising cumbersome cords and chains.

## Roller Blinds

— protection from the elements —

Large windows are a wonderful way of connecting the indoors and outdoors. Verosol Roller blinds are perfect for solar control and heat retention.

## Roller Blinds

— feather light control —

Verosol Roller blinds are incredibly smooth and easy to operate. The feather light control makes it a breeze to raise large blinds.

## Roller Blinds

— twin blinds, the ultimate solution —

Two blinds in one, Verosol Twin Roller blinds offer daytime privacy, vision out and sun control. At night, enjoy room darkening and insulation.

## Roller Blinds

— enjoy the view —

Verosol's metal backed fabrics such as SilverScreen deliver maximum protection from the sun, independent of the interior colour, whilst maintaining great views and contact with the outside world.

## Pleated Blinds

— European style & design —

• imported fabric featured

Verosol's signature product.  
Pleated blinds combine the soft appeal of a curtain with the versatility and simplicity of a blind.

## Pleated Blinds

— the perfect fit —

Pleated blinds are not only the ideal solution for heat and light control but they almost disappear when raised. Minimal light gaps also help to reduce glare.

## Pleated Blinds

— make a statement —

Verosol's versatile Twin Pleated blinds are practical for both day and nighttime use. Select a sheer fabric and enjoy your daytime view; as well as a blackout fabric for room darkening and insulation at night.

## Pleated Blinds

— open up your world —

From sheer fabrics which preserve the view to blackout fabrics for seclusion, all Pleated blinds reduce heat and glare whilst harmonising with the design of the room. Aesthetically pleasing and practical, they are the complete solution.

## Pleated Blinds

— colour your world —

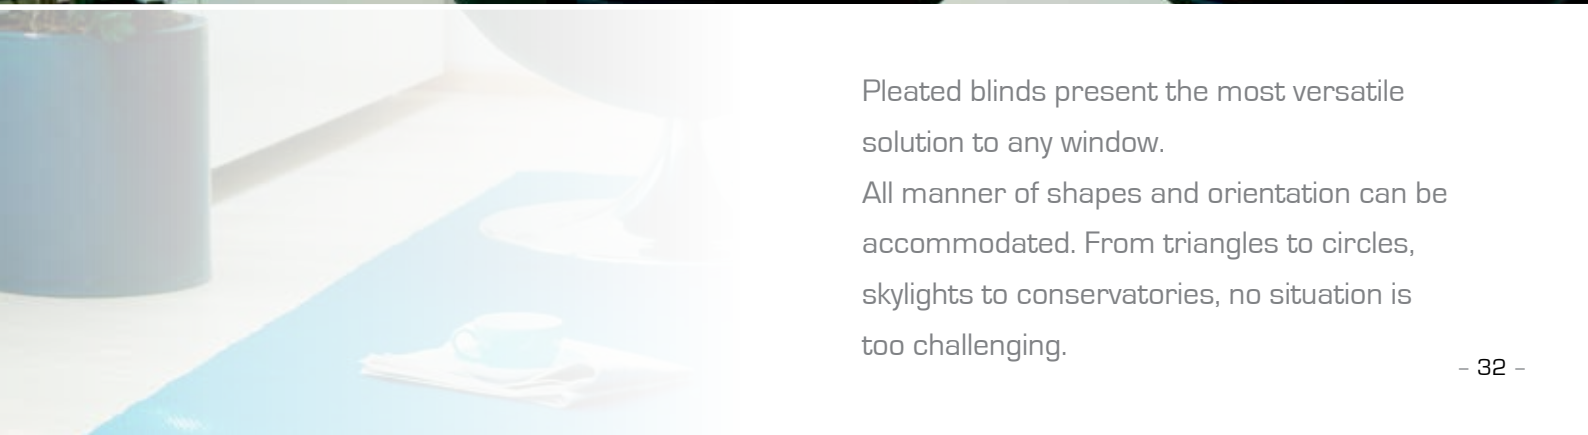

Available in many colours and models, Pleated blinds can become a striking feature, lifting the mood and character of any room.

## Pleated Blinds

— a blind to fit any window —

Pleated blinds present the most versatile solution to any window.

All manner of shapes and orientation can be accommodated. From triangles to circles, skylights to conservatories, no situation is too challenging.

# Timber Shutters

— furniture at your window —

Verosol Western Red Cedar Shutters are made from the highest quality air dried timber. Using thicker frames and more robust Western Red Cedar construction to handle the demands of very large shutters.

# Timber Shutters

— versatile control —

By simply tilting the blades, your Shutters will regulate light, air flow and even provide privacy. Dual tilt operation allows the blades to open and close independently, top and bottom.

## Timber Shutters

— good looking from inside & out —

The beauty of Shutters is that they look great whatever your point of view. Both inside and out, Verosol Shutters enhance the look of your home or apartment.

# Hardwood Shutters

— uninterrupted views —

With the warmth of real timber, Verosol's Hardwood Timber Shutter will compliment any decor. Featuring a light weight frame with a concealed aluminium control rod allows for full closure of blades in two positions, providing clear and uninterrupted visibility.

# Aluminium Shutters

— the outdoor shutter —

Verosol's Aluminium shutter offers sleek and subtle lines usually associated with internal products thus creating a consistent smooth transition from indoor to outdoor when combined with our Timber Shutter range.

## Venetian Blinds

— and now for something different —

# Venetian Blinds

— classic looks —

Our 25mm Streamline Venetian blinds offer practical light regulation and privacy control. They can be fully raised or the blade angle adjusted to suit.

## Panel Glide Blinds

— the modern day curtain —

Panel Glide blinds are a striking alternative to more common window coverings and are particularly well suited to sliding doors. Their curtain-like overlapping panels cleverly remove light gaps.

## Panel Glide Blinds

— no cords necessary —

In situations where cords are not wanted,  
Panel Glide blinds can be fitted with a simple wand.

## Remote Control

— convenience at the touch of a button —

Raising and lowering blinds has never been this easy. Verosol provides the convenience of remote control across its entire range. You can even let the sun do the work for you with a sun sensor.

# Remote Control

— child safety —

Remote control removes the hazard of cords.  
In rooms where your children play, remote  
control provides peace of mind and less clutter.

# Remote Control

— when size matters —

Raising a large blind is heavy work. Verosol's remote control makes life easier for the whole family. Or for total control, simply link them to your home automation system.

Verosol's long tradition of supplying premium quality window furnishings around the world, includes a five year nationwide warranty across the entire range.

Visit the warranty section of our website [verosol.com.au](http://verosol.com.au) to watch our use, care and maintenance video's.

**5 Year Warranty**  
— for peace of mind —
